# Hugo Feufeu, Solana Developer

## ABOUT ME

02

Recent graduate and passionate Solana developer, eager to grow and contribute to real-world projects. Member of Superteam France and winner of the Colosseum Hackathon with Huch (Gaming x University track), I'm actively looking for opportunities to put my skills to work and keep learning fast.

Hungry to build, improve, and innovate on-chain, I'm ready to bring energy, curiosity, and creativity to a Solana team. My goal is to turn potential into impact, and grow into one of the builders shaping Solana's future.

## EXPERIENCE

03

## SKILLS

05

2025 - Present

Rust

Anchor

### Huch. - CEO

Javascript

TypeScript

Led the development of a Solana-based dApp, managing smart contracts, wallet integration, and front-end coordination across platforms.

React

Solidity

Balanced product vision, technical needs, and user feedback while overseeing tokenomics, growth strategy, and community engagement.

C

C++

Ruby

Python

2024 - 2025

## LANGUAGES

06

### ACQUIRED - Intern

French

C2

Worked on backend systems powering AI-driven product recommendation tools. Contributed to API development, data processing pipelines, and system optimization to support large-scale e-commerce platforms.

English

C1

Collaborated closely with AI engineers and product teams to ensure performance, scalability, and clean integration with ML models. Gained hands-on experience with production-ready code and fast iteration cycles.

Portuguese

C1

## EDUCATION

04

2024-2025

### 42 School

Computer Science
